# File Formats

37

## Different Purposes

archive master format:

→ for preservation

mezzanine format:

→ for professional use in post-production

dissemination formats:

→ for widely spreading and easy access

39

## Principles

- The archive must be able to handle the file formats it holds.

- open source
- simple to use and well documented
- widely used by the community

38

Elena Rossi-Snook:

Archiving without access  
isn't preservation,  
it's hoarding.

40

## Archive Master (Today)
